

## All-steam Presses

### Professional Steam Iron RSP-320

- Comfortable for usage over long and continuous working hours
- Built for the personal safety of operator's hands
- This iron is designed for ironing seams during under-pressing

Model	Dimensions (LxB)	Steam pressure	Weight
	mm	(kg/cm)	(kgs)
RSP 320	190 x 60	10	1.0

### Professional Steam Iron RSP-420

- Comfortable for extended use, with a non-slippery urethane handle designed via bio-engineering
- Widely-spread steam holes located on the edge of iron base help spread the steam evenly and ease out the ironing of difficult areas

Model	Dimensions (LxB)	Steam pressure	Weight
	mm	(kg/cm)	(kgs)
RSP 420	202 x 100	10	1.3

### Professional Steam Iron RSP - 620

- Extra wide sole plate helps in the ironing of large areas
- Adjustable venturi valve draws condensate that may form assuring 100% dry steam and no water spots
- The long life steam valve is virtually free of any maintenance
- This iron has an adjustable screw on the steam valve which can modify the steam quantity

Model	Dimensions (LxB)	Steam pressure	Weight
	mm	(kg/cm)	(kgs)
RSP 620	200 x 142	10	1.6

### Ramsons PEN-80S

- Easy to use. No electricity required
- The lightest touch of the swing level releases a flow of dry steam. The long life steam valve is virtually maintenance free
- An adjustable venturi valve draws any condensate that may form, assuring 100% dry steam and no water spots
- A solid stainless steel base retains heat and provides a greater pressing surface durability as well as a longer life
- An extra large sole plate eases the pressing of large areas
- Perfect for all flat work (sweaters, knitwear, etc)

Model	Weight	Dimensions (L X B)
